

Koinobori Decorations – examples from previous Children’s Day events

Below are a collection of decorations made by schools students for the Children’s day event.

Past experiences had a few decorations not fare as well as others in the outdoors. Substantially reinforced holes for hanging is very important!

Please look through the images below and consider your materials and embellishments carefully.

The use of wax paper and crayons, recycled painted and colourful fabrics, stitched, tied or hot glued embellishments and paper/painted decorations lightly hand waxed once completed, all make for well weather-proofed decorations.
