

Public life data

Method

Pedestrian counts and observations

The purpose of this study was to examine how public spaces are used. It provides information on where people walk and stay either as part of their daily activities or for recreational purposes. This can form the basis for future decisions on which streets and routes to improve, to make them easy and pleasant places to visit, and not just act as traffic conduits.

The study also provides information on how many people sit, stand or carry out other staying activities in the city and where they do it. These staying activities act as a good indicator of the quality of the urban spaces. A large number of pedestrians walking in the city does not necessarily indicate a high level of quality. However a high number of people choosing to spend time in the city indicates a lively city of strong urban quality.

How the data was collected

- Counting pedestrians
- Surveys of staying activities (behavioural mapping)

Method

The method for collecting this information has been developed by GEHL Architects and used in previous studies in Perth, Melbourne, Adelaide, Wellington, London, Riga, Stockholm, Oslo, Copenhagen, Rotterdam, Edinburgh and a number of provincial cities in UK and Scandinavia.

- Pedestrian counts were carried out in selected streets for 10 minutes every hour between 8 am and 12 midnight.
- Staying activities were mapped every second hour between 10 am and 8 pm.
- The surveys took place during summerdays with fine sunny weather in March 2010 and during winterdays in August 2010
- The data was collected on weekdays (Tuesday / Wednesday) and a Saturday.

Study areas

The counting positions have been chosen to provide the best possible overview of pedestrian traffic. The areas for recordings of staying activities are equally chosen with the intention to achieve knowledge of the study area as a whole.

- 13. Salamanca Place

Pedestrian traffic - summer weekday

Survey of pedestrian traffic

As part of the public life survey, a pedestrian traffic survey was undertaken on selected streets throughout Hobart. Counts were made in the period between 8am and 12 midnight and totals were determined for daytime and evening traffic on each street. In total, approximately 158,500 pedestrians were recorded during Tuesday the 2nd of March.

Pedestrian traffic contained along shopping streets

The general walking pattern shows that the highest concentrations of pedestrians are found in the retail core around Elizabeth Mall. Most of the pedestrian traffic is located in shopping streets and there is a limited spread over the rest of the city centre. The busiest areas in the city centre are Elizabeth Mall, The bus mall and Liverpool Street.

Limited pedestrian activity at night

Compared to daytime traffic pedestrian numbers drop dramatically when shops and offices close down and the majority of all visitors leave the city centre. Large sections of the city centre become more or less deserted. This can be attributed to a lack of diverse functions in the city centre, where people enter the city mainly for shopping and working, and leave when the work day ends. Only Salamanca Place and Morrison Street experience a fair number of pedestrians.

The 3 busiest streets between 8am - 12 midnight:
Elizabeth Mall approx. 24,000 ped.
Elizabeth bus mall approx. 18,000 ped.
Liverpool St approx. 12,500 ped.
(between Argyle St and Elizabeth St)

Total sum of pedestrians

Summary: Inactive at night

Reasonable numbers of pedestrian but concentrated in a small area in and near Elizabeth Mall, The Bus Mall and Liverpool Street of the city centre. Hobart becomes inactive after 6pm when the shops and offices close. The counts display a remarkably quiet city at night time on a normal weekday.

Evening traffic make up **14%** of total pedestrian traffic

Pedestrian traffic - day time

Summer weekday 8am - 6pm. Tuesday the 2nd March 2010. Weather: Mild 22° C

6,582 pedestrians all day

Pedestrian traffic - summer Saturday

Increased activity compared with weekday

In total, pedestrian traffic in the streets recorded is during a Saturday approximately 216,000, 36% more pedestrian traffic than recorded on a weekday. Pedestrians are still spending most of their time on shopping streets, but they are also starting to take more advantage of the harbour front, with increase of levels along Franklin Wharf. There is also an enormous increase in pedestrian traffic along Salamanca Place as a result of Salamanca Market on Saturdays.

Salamanca Market is the big draw on a Saturday.
Pedestrian traffic on Salamanca Place is 7 times higher on a Saturday than on a weekday

More pedestrians than on weekday evenings

There is a lack of pedestrian activity during Saturday evening compared to Saturday daytime. Similar to the situation during the week, levels of pedestrian activity substantially drop after 6pm. Evening traffic is primarily present along Salamanca Place. Private arcades such as Elizabeth Lane and the Arcade, which attract over 25,000 pedestrians during the day are completely shut down at night. There are more people in the city centre on a Saturday evening than on a weekday. The busiest places are again Salamanca Place and Morrison Street.

The 3 busiest streets between 8am - 12 midnight:
Salamanca Place approx. 66,700 ped.
Morrison St approx. 24,000 ped.
(at Parliament Square)
Elizabeth Mall approx. 18,500 ped.

Total sum of pedestrians

Comparison Weekday - Saturday:

Number of pedestrians between 8am - 12am
- sum of counts in number of selected streets

Summary: More pedestrians on weekend than weekday

There are no significant changes in the use of the pedestrian network on a Saturday apart from the high number of pedestrians on Salamanca Place and Morrison Street because of Salamanca Market and it is important that the city acknowledge the influence of the market. Saturday evening also have more people than on a weekday evening. The busiest places are Salamanca Place and Morrison Street.

36% more pedestrian traffic recorded on a Saturday compared with a weekday.

Pedestrian traffic - day time

Summer Saturday 8am - 6pm, the 6th March 2010. Weather: Mild 24° C

4,968 pedestrians all day

Pedestrian traffic - winter weekday

Less pedestrian compared to a summer weekday

There are less pedestrian volumes (- 26%) during winter than during summer. In total, approximately 117,300 pedestrians were recorded during Thursday the 5th of August. Basically the same pattern is repeating itself during the different seasons.

Low level of evening traffic

At night the same pattern are found as for summer weekday and Saturday. Not much is going on. The busiest locations being Salamanca Place and Morrison Street.

The 3 busiest streets between 8am - 12 midnight:

Elizabeth Mall	approx. 18,700 ped.
Elizabeth bus mall	approx. 14,800 ped.
Liverpool St	approx. 9,200 ped.

(between Argyle St and Elizabeth St)

Total sum of pedestrians

26% less pedestrian traffic recorded on a winter weekday compared with a summer weekday.

6,414 pedestrians all day

Staying activities - summer weekday

Survey of staying activities

A vibrant city does not necessarily have the same amount of public life everywhere. Less populated spaces are important for getting some peace. The survey of the staying activities illustrates how the public spaces are used. Surveying what people do in the spaces is important since the number of people, in itself, does not tell much about the public spaces. Surveying what people are doing indicates which public spaces people choose to spend their time. Comparing a public space, where many people sit on benches and socialize, with another public space where many people are waiting for the bus, but not sitting on benches shows that the first public space is a space people like to be in - and choose to spend time in.

The survey registers the number of people staying in each place in the following categories: - those who are standing, sitting or lying down as well as those who are engaged in cultural or commercial activities, such as vendors and street artists or children playing. Stationary activities were recorded in 13 locations in the city centre between 10am and 8pm.

Minimal activity near the waterfront

The activities are mostly sitting on benches (resting, socializing), sitting in cafés (resting, socializing) and standing (looking at goods on the street, speaking to friends and relatives). These are the major activities and it is only in Elizabeth Mall and Salamanca Square that cultural and small scale commercial activities are found. On a summer weekday few public spaces are highly populated, but most of the surveyed spaces do not have many visitors. The popular public spaces are Elizabeth Mall and Franklin Square. The medium used spaces consist of Salamanca Place, Salamanca Square and Elizabeth Bus Mall. The rest of the surveyed spaces in the city centre are not frequently used.

Average number and distribution of staying activities

12pm - 4pm, Tuesday the 2nd of March 2010

Summary: Introverted city centre

City life is concentrated within just a few city blocks of the city centre and the surrounding areas are rather inactive. The heart of the city centre is dominated by commercial activities during the day and is closed, inactive and uninviting during the evenings. Today the city centre seems very introverted, it works within itself and gives nothing back to the surrounding city context.

In total **1,900** activities were recorded in the period between 12pm - 4pm in Hobart

Dominant activity

Sitting on café chairs is the most dominant activity (32%) especially in Elizabeth Mall, Salamanca Place and Salamanca Square

Staying activities - summer weekday

(registered at selected times)

Staying activities - summer Saturday

A popular Saturday Market

The market that takes place on Saturdays along Salamanca Place is a model for the level of activity Hobart should expect throughout the city centre. Both along Salamanca Place and within Salamanca market, there is a consistently high level of activity and diversity of activities. Currently, this activity is mostly contained within Salamanca Place.

Few activities for children

Of all the activities that were recorded on a Saturday, only 2% represent activity for children. There is a markedly low number of playgrounds and places designed for children within Hobart. Currently, the activity is limited to the playground on Princes park with minimal activity in Wellington Court and Salamanca Square.

Salamanca Market is a big draw on a Saturday and the public spaces around the market are crowded with people enjoying the city life:

Staying activity on Salamanca Place is **+286%** higher on a Saturday than on a weekday.

Staying activity on Salamanca Square is **+228%** on a Saturday than on a weekday.

Staying activity on Parliament Gardens is **+858%** on a Saturday than on a weekday.

Average number and distribution of staying activities

12pm - 4pm, Saturday the 6th of March 2010

* Only parts of Salamanca Place was counted because of Salamanca market. Stationary activity at the Market was counted at 10am and had a total of 2,050 people standing and sitting + 340 market stalls.

Dominant activity

Sitting on café chairs is the most dominant activity (40%) especially on Salamanca Place and Salamanca Square.

In total **4,290** activities were recorded on a Saturday in the period between 12 pm - 4 pm in Hobart

The Saturday activity level make up **226%** of the activities recorded on a weekday

Students and volunteers involved

Without the very enthusiastic help and efforts from volunteers and students from Hobart City Council and the University of Tasmania School of Architecture & Design it would not have been able to collect all the 'public spaces and public life' data presented in this report, including information on public life and public space. Special thanks to Lecturer Helen Norrie and Research Assistant Adam Dyason from the University of Tasmania School of Architecture & Design for the great help.

The following people have participated in collecting data:

Internal project team from Hobart City Council

Andrew Tompson, Director City Services
James McIlhenny, Senior Development Planner
Brendan Lennard, Senior Cultural Heritage Officer
Barry Holmes, Manager City Planning
Rohan Probert, Senior Statutory Planner
George Wilkie, Executive Manager City Design
Jeremy Johnson, Landscape Architect
Penny Saile, Manager Community Inclusion
Philip Holliday, Manager Events & Cultural Development
Simon Duffy, Community Development Officer
Jane Castle, Public Art Coordinator
Nick Dwyer, Manager Road Engineering
Stuart Baird, Sustainable Transport Officer
Mark Painter, Group Manager - Engineering Services
Mark Wise, GIS Coordinator
Rachel Reeves, GIS Development Officer
Andrew Robert - Tissot, Arboricultural Officer

Students from University of Tasmania School of Architecture & Design

A vibrant and inviting city is an important element in attracting people to live, work and visit but also beneficial for the image of the city as a whole. The city should be a people place, offering a multitude of activities for all user groups.
