

Submission from Sue Hickey

Candidate for Clark

1. *Greater investment on kunanyi / Mount Wellington*

Halls Saddle – I am supportive of upgrades to the Halls Saddle carpark subject to support from the Federal and State Governments. Of course I will help advocate for this funding. Rail-guard improvements are an absolute must for road safety and I would be happy to advocate to the Government to support this.

2. *Improved public and active transport infrastructure and a commitment to deliver the Hobart Transit Centre*

I have long been a believer that improving public transport and active transport infrastructure will contribute to solving greater Hobart's congestion problems. I will definitely support championing to the Government to support the Hobart Transit Centre, noting that despite an election commitment in 2018, nothing has been delivered and traffic problems have increased.

3. *Redevelopment of Doone Kennedy Hobart Aquatic Centre*

I have advocated to the State and Federal Governments for a long time to fund upgrades to the DKHAC, which is a much loved and well utilised facility by not only the people of Hobart, but greater Hobart and visitors from intra and interstate. I think it is tragic that this has not been funded, especially the warm water pool for those in need of therapy.
