

# Council Centre Recycling Unit

Drop off tricky to recycle items for free here

The City of Hobart is aiming for zero waste to landfill by 2030. Help us get there by using a recycling bank at the Council Centre to recover hard-to-recycle products. Use this flyer to make sure only correct items are disposed of at the unit.

## Give your waste a second life

**PLASTICS**  
Down-cycled into products like garden pots, park benches and synthetic decking.

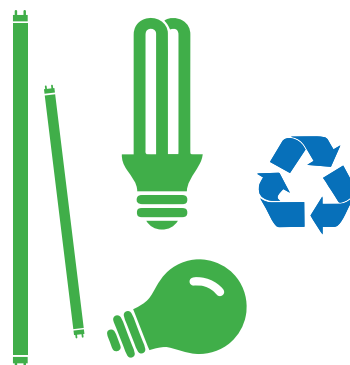

**E-WASTE AND BATTERIES**  
Precious metals recovered for remanufacture. Plastics down-cycled into Laserlite roofing, machine casings, lego and car components.

**TONER CARTRIDGES**  
Turned into Modified Toner Polymer (MTP), and mixed with asphalt for road surfacing.

**X-RAYS**  
Silver is recovered for remanufacture and PET plastic is down-cycled into products.

**LIGHT GLOBES AND FLUORO TUBES**  
Mercury is re-used in the manufacture of dental amalgam. Glass is recycled into glass wool for home insulation. Phosphor powder is recycled into fertiliser products.
